Drywall Bead Access Doors

Doors are designed for flush installation in drywall surfaces. Door features a concealed hinge that prevents distortion and closes door squarely.

Door and Frame are fabricated from 16 gage, galvanized steel with a white prime coat finish.

Frame has 1/4" mounting holes positioned to allow anchoring directly to studs to assure a secure mounting. A drywall bead on the frame allows the drywall joint compound to be applied over the bead at the same time as the joints and corners.

Flange has pre-punched holes to provide grip for the joint compound and facilitate fastening the flange to framing members with drywall screws.

Hinge is a concealed continuous piano hinge.

Latch is screwdriver operated.

Finish is a white prime coat suitable for painting.

Guide Specification

Provide Elmdor® DWB Series, Drywall Bead access doors (specify model number and options.) Access door and frame shall be fabricated from 16 gage, galvanized steel with a white prime coat finish. Frame shall have mounting holes positioned to allow anchoring directly to the studs, assuring a secure mounting. Hinge shall be a concealed continuous piano hinge.
